Coordination of Readiness Support

- Common National REDD+ Steering Committees across initiatives
- Coordination units across initiatives
- National REDD+ Strategies:
 - Drivers
 - Scale & scope (link to FREL/FRL)
 - Priority PAMs
 - Warsaw Framework requirement

Challenges for National REDD+ Strategies

- To be sufficient to drive Phase 2 implementation
- To be seen as more than one Ministry's wish-list
- To be embedded in national development process and linked to NDC
- To provide a framework to guide investments across sectors
- To influence donors to align their support

Coordination of Phase 2 Investments

- Overarching programme or investment plan to guide all donors & sources of funds
- Theory of change & results-framework. Explain how PAMs will achieve REDD+ results
- Clear management arrangements
- Investment schedule
- Common set of criteria

UNDP support to coordination in Peru

- Needs assessment identifying requirements of Norway/Germany (JDI), FCPF, UNFCCC
- Align financial and human resources
- Harmonization of National Forest & CC Strategy and JDI
 - Implementation plans
 - M&E frameworks

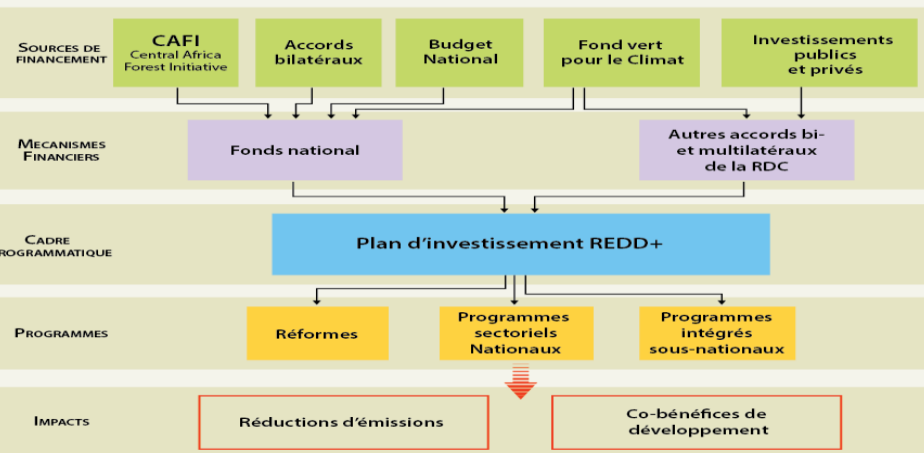

Central African Forest Initiative (CAFI) DRC Example

Empowered lives.
Resilient nations.

- Support based on National REDD+ Investment Framework
 - Including FCPF CF, FIP etc
 - Donor buy-in
- Funds channelled through a National REDD+ Fund (FONAREDD)
- Ministry of Finance leadership
- Sectoral & integrated investment programs

Mise en œuvre de la stratégie-cadre nationale REDD+ en RDC

Conclusions

- National REDD+ Strategies or Action Plans need to be transformed into investment frameworks
- Programmatic-approach may be more suitable for Phase 2 investments than “project” interventions of donors
- Need for a lead donor (such as GCF) to insist on a CAFI-like approach of national frameworks to foster coordination

Thank you!
