

Norway's payments to Brazil for reduced emissions from deforestation are transferred to the Amazon Fund, launched by Brazil in 2008, according to the [Brazilian Decree nr. 6.527 of 1st August 2008 \(only in Portuguese\)](#).

The payments made so far are based on the [methodology of the Amazon Fund](#) while recognizing since 2014 Brazil's Forest Reference Emission Level submitted and assessed under the UNFCCC.

The certificates for every payment made from Norway to Brazil can be found [here](#).

Payments made by Norway to Brazil:

Date (Year)	Average deforestation rate (basis for estimating results) (km ² /year) *	Deforestation rate Prodes (km ² /year)	Results attested by the Amazon Fund Technical Committee (tCO _{2eq} /year)**	Quantities for which payments were received (tCO _{2eq} /year) Payments from Norway based on the Amazon Fund methodology
2006	19,625	14,286	200,000,000	23,911,039.60
2007	19,625	11,651	303,000,000	-
2008	19,625	12,911	245,700,000	-
2009	19,625	7,464	445,918,000	28,347,560.00
2010	19,625	7,000	462,916,666	33,363,022.00
2011	16,531	6,418	490,210,820	33,363,022.00
2012	16,531	4,571	580,179,600	32,733,224.00
2013	16,531	5,891	516,146,400	24,746,724.31
2014	16,531	5,012	558,786,690	24,000,000.00
2015	16,531	6,207	500,817,240	19,590,670.23

* Average deforestation rate (ADR) based on ten-year periods, updated every five years.

ADR for years 2006-2010 based on ten-year period 1996-2005

ADR for years 2011-2015 based on ten-year period 2001-2010

** Emission factor 2006-2010 = 100 tonC/ha and 2011-2015= 132,3 tonC/ha
