

COP24·KATOWICE 2018
UNITED NATIONS CLIMATE CHANGE CONFERENCE

FORESTS FOR THE CLIMATE: how science is helping forests

Date: 24th of June 2019, 13.00 – 16.00

Room: AH Lower

13.00 - Introduction: Monika Figaj (Poland)

13.05 – Research on the state of forests, moderator: Jose Prado (Chile)

(FAO) - Scaling up forest solutions for climate and development

Giacomo Grassi (EU) –Forest CO2 sink: bridging gaps between science and policy

Andrzej Jagodziński (Poland) – Carbon reservoirs of Polish forests – from science to practice

Wang Guosheng (China) – The policies of forestry carbon sink in China

Discussion

14.20-14.40 coffee break

14.40 – Research on specific forest issues , moderator: Monika Figaj (Poland)

Almeida A. Siteo (Mozambique) - Forest science in support to climate change decision making in Mozambique

Marcelo Rocha (Brazil) – Latest developments in the 2019 Refinement to the 2006 IPCC Guidelines: Interannual variability (IAV)

Robert Matthews (UK)– Carbon in harvested wood products and climate change mitigation: estimation, benefits and issues

Jose Prado (Chile) – Progress on MRV for REDD+

Veronique de Sy (CIFOR) - Forest monitoring in support of land-based climate change mitigation

Discussion

15.55 - Closing remarks: Jose Prado (Chile)

16.00 – closure and sandwiches
