

Join us for the online and on-site launch of
Over a decade of REDD+: Outcomes and socio-ecological impacts
at a World Forestry Congress (WFC) side event!

Date: 4 May 2022

Time: 5:30 PM – 7:00 PM (Seoul time, UTC+9)

Organiser: IUFRO Global Forest Expert Panels (GFEP) Programme

Forests play a pivotal role in regulating our global climate and represent a cornerstone of our strategy to tackle climate change. REDD+ was conceived as a mechanism to compensate low- and middle-income countries for the conservation of their forests.

A new assessment evaluates the actual on-the-ground impacts of REDD+ activities on forests, climate, biodiversity and people.

Speakers:

Valerie Kapos, *UNEP-WCMC* (Author)

Stephanie Mansourian, *Consultant; IUFRO* (Author and Editor)

Constance McDermott, *University of Oxford* (Author)

John Parrotta, *USDA Forest Service* (Author and Editor)

Marieke Sandker, *Forest carbon expert* (Author)

Bhaskar Vira, *University of Cambridge* (Author)

Stakeholder views from Asia and Latin America

Responses from rulemakers

Darinka Blies (BMZ, Germany)

Dirk Nemitz (UNFCCC)
